

Create zero carbon South Yorkshire

	<p>Breakout room (i) Carbon reduction projects</p>	
	(you don't need to list who is in the room, we will be capturing a list via zoom)	<p>Answers here, one idea per box (If it's more than 3-7 words, it's probably more than one idea!)</p>
	<p>When answering these questions, take into account the Systems and Settings model (used in the initial bid) to make sure all aspects are covered::</p> <p>Systems: Energy/Transport/Food/Waste/Land & Water/Air/Money/ Democracy & Media</p> <p>Settings: Communities & Home/Workplace/Natural Environment/Education/Health & Social Care/Arts/City Centre</p>	
Qu I	In relation to our topic, what is already going on amongst us in South Yorkshire?	Health - government announcement zero carbon in nhs plan, each trust obliged to have a green plan, making available an audit toolkit to improve scope 1 and 2 emissions
		Diocese trying to get funding for grants for primary school - difficult application process
QI	What else is going on in South Yorks which we could effectively link in with?	Listed buildings - Joy trying to get national trust involved in using a listed building as a case study and look at retrofitting

		Trying to establish links between business providing low carbon tech and those needing it - case studies
		Local food growing gardens. Heeley City Farm have network of 15 community gardens throughout Sheffield. About 15 acres on previously unused land. Churches, Firestation, allotments, community centres etc. Organic growing, improving soil, reducing transport pollution, improving health, water conservation etc.
		Waste heat - mark woodward
QI	Who else could we reach out to in order to strengthen our work?	Trying to establish links between business providing low carbon tech and those needing it - case studies
		Ensuring that attentions are focussed on the right areas - Mike explained about inhalers and the potential reductions in carbon footprint that doesn't get any attention
		Help to promote local tourism to reduce travel miles
		Improve public transport and cycle routes
		Access to grants and helping with access to experts and tech

Q 2	What are the aspects of our topic which are not getting any attention in S Yorks currently and which we feel need to be addressed?	Heat - huge wasted resource in the region that could be harnessed
		Lack of joined up thinking - sign posting etc
		Money is a large issue - can be expensive to reduce carbon -South Yorkshire Energy Centre at Heeley City Farm, energy conservation and retrofitting advice, fuel poverty and affordable warmth advice
Q 3	What is the importance of this strategy to the vision? (carbon reduction)	It is the vision
	What is its particular contribution?	
	What would happen to the vision if we did nothing in this arena?	Housing issues with retrofitting funding and skills
		Hospitals large users and underfunding
		Hills - flooding issues
		Fuel poverty
